

How the ISCA member organization, which the candidate is related to, can support the candidate's work in the ISCA Executive Committee.

From my position I may support organizations which are related to me for these reasons:

1. I've learned to reconcile ideas of different cultures and idiosyncrasies and I understand what global aspects can be incorporated locally and vice versa.
2. I can share my experience as director of Educacion Entretenida a company with educational programs that helps creating awareness of the importance of daily physical activity through an intellectual and fun process and the use of imagination and technology.
3. The knowledge I have based on several international organizations that under ISCA's umbrella had visited Colombia to inspire us with their successful models allows me to offer a global understanding of how to create programs of our countries based on the learning experience.
4. I wish to share ideas to the organization related to how they can linked entities in to carry out events aligned with their needs and make success events and to have relationships to generate inter-institutional synergy with public and private entities.
5. I could guide organizations how to apply the essence of ISCA focus in the international cooperation, transference of knowledge and stimulating partnerships. How to promote ISCA as an international entity that offers a variety of tools from different countries. How to join to development activities with similar objectives.
6. My organization implemented an educational project for instructors led by DGI and ISCA that promote physical activity through play. The project has 4 section training and an additional support through an online education portal that all organizations can use or inspire on it.
7. With the agreement between ISCA and Colombia National Learning Service (SENA) of international cooperation that has 7 million apprentices per year thus becoming the network that we needed, we can do programs with organizations from different countries they are interesting in like Brazil, Peru, Argentina, Spain etc. So this agreement opens doors for all of us.

I wish to continue contributing with the experience gained and as Latin American to support the different organizations to expand Isca philosophy and together fight the pandemic of the 21st century: the sedentary lifestyle.
